

COVID 19

**Power point by Alessandro
Leone**

WHAT IS COVID 19?

- **Coronavirus** is an infectious respiratory disease.
- The virus is spread via small **droplets** produced by coughing, sneezing and talking.
- Common **symptoms** include fever, cough, fatigue, shortness of breath, and loss of smell and taste.
- To limit transmission, it is recommended to maintain **physical distance** and correct **hygiene** behaviors.
- There is currently no **vaccine** for this disease.

How can I avoid the risk of infection?

Here are four precautions you and your family can take to avoid infection:

Wash your hands frequently using soap and water or an alcohol-based hand rub

Cover mouth and nose with flexed elbow or tissue when coughing or sneezing. Dispose of used tissue immediately.

Avoid close contact with anyone who has cold or flu-like symptoms

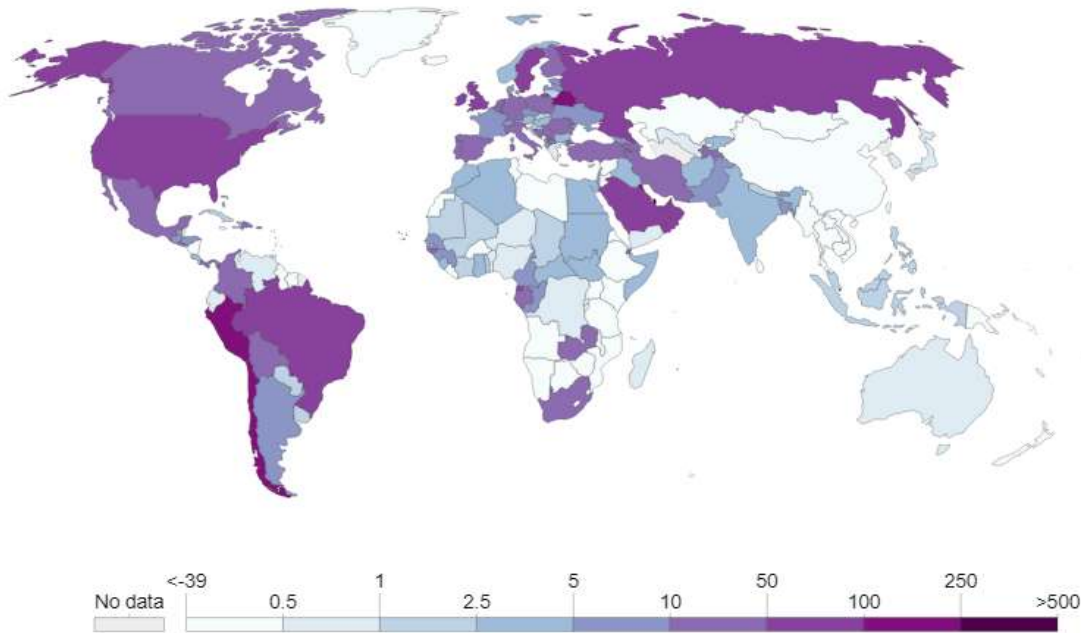

Seek medical care early if you or your child has a fever, cough or difficulty breathing

COVID 19 EFFECTS ALL OVER THE WORLD

Daily confirmed COVID-19 cases per million people, May 15, 2020
The number of confirmed cases is lower than the number of total cases. The main reason for this is limited testing.

Our World
in Data

As of May 15th more than 4.5 million cases have been reported in more than 188 countries.

A lot of famous people have contracted Covid 19

ALESSANDRO'S LIFE BEFORE AND AFTER THE PANDEMY

- I went to school at Molinari
- I played basketball in the gym
- I enjoyed pizza at the restaurant
- I met my friends around my neighborhood
- I went everywhere anytime

- I attend video-lessons in my bedroom
- I do only some virtual training at home
- I make pizza in my kitchen
- I meet my friends in videochat
- Almost everything is locked-down
